- Own development projects
- Learning new technologies
- Member of snooker club
- Multiplayer games
- Listening to music
- Brain trainers

Hi! I am Steff_

Full stack developer / DevOps enthusiast

Developer with a passion for web development and DevOps. Motivated to expand knowledge and skills with the latest technologies and frameworks.

Loves working on projects as a team player in an agile environment. Focused on getting it right, and aware that small details can have a big impact.

Work experience_

Many lines of code and coffee

Analyst Developer at aariXa

July 2017 - Present

aariXa's development stack includes: Angular, .NET Core, MS SQL, Azure, Windows Server, ... so mainly focused on Microsoft technologies. I have been working on a new Cloud Native, realtime, multi-tenant web app hosted as microservices which run in Docker containers as an in-house developer.

CRM Developer at Bridgestone

October 2016 - June 2017

I have worked on a project for Bridgestone as CRM Developer, customizing Dynamics 365 CRM with business logic. Like writing plugins in C# and building custom UI components and apps with TypeScript, Knockout.js and many more of the latest technologies.

Education_

Hours of learning new technologies

Professional Bachelor's Degree in Applied Computer Science

September 2013 - June 2016

Specialization: Application Development - Web & Mobile
